

COURSE DESCRIPTION CARD

<b>Course name</b>	Forest management in a changing climate							
<b>Course type</b>	Optional	<b>Course code</b>		<b>ECTS credits</b>	1			
<b>Forms and number of hours</b>	Lecture: 10 h	<b>Scientific discipline</b>	Forestry					
<b>Course objectives</b>	Familiarizing PhD students with issues related to forest management in a changing climate							
<b>Course content</b>	1. Climate change and forest. 2. Adaptation activities of the State Forests to climate change. 3. Tree growth under global climate change: management strategies 4. Future distribution basic forest-forming species: contrasting climate-response forecasts 5. Principles of social forest management							
<b>Teaching methods</b>	The multimedia presentation, information lecture, tasks for self-development							
<b>Assessment method</b>	Passing							
<b>Symbol of learning outcome</b>	<b>Learning outcomes</b>			<b>Reference to the learning outcomes for the field of study for the 8<sup>th</sup> level of Polish Qualification Framework (PRK)</b>	<b>Methods of assessing the learning outcomes</b>			
<b>LO1</b>	The PhD student has knowledge about changes occurring in forests in connection with modern climatic trends.			SD_W1, SD_W2	Passing the lecture			
<b>LO2</b>	The PhD student is able to formulate the scope of activities carried out in forests under conditions of changing climate.			SD_U1	Passing the lecture			
<b>LO3</b>	The PhD student is able to determine the potential ranges of basic forest-forming species and the importance of community forests in modern forest management.			SD_U1	Passing the lecture			

Student workload (in hours)	
<b>Lecture</b>	10 / 0 / 0 / 0 / 0
<b>Consultations</b>	5
<b>The unassisted student work</b>	15
<b>Implementation of project tasks and preparation for and participation in exams/tests</b>	10
<b>Total</b>	40
<b>ECTS credits</b>	1
